HARSH PARDHI

Azure Cloud Engineer · Cloud Operations & Automation

Location: Nagpur, Maharashtra, India | **Phone:** +91 9529667349 | **Email:** harshpardhi499@gmail.com
LinkedIn: linkedin.com/in/harsh-pardhi | **GitHub:** github.com/HP04Harsh | **Portfolio:** harsh-pardhi.vercel.app

SUMMARY

Azure engineer with 2 years of experience running cloud operations and building automation for enterprise clients. My work sits where cloud administration, scripting and reporting meet: I move workloads into Microsoft 365, replace manual processes with PowerShell and Python, and give teams dashboards they can act on. Microsoft Certified Azure Administrator (AZ-104), with hands-on Terraform, Kubernetes and CI/CD from client work and self-built projects, and a growing focus on AI-assisted infrastructure operations.

TECHNICAL SKILLS

Cloud: Microsoft Azure — Virtual Machines, VNet, Blob Storage, Entra ID, RBAC, Key Vault, Azure Monitor, Log Analytics (KQL), Azure Automation, Cost Management; Linux, Windows Server
DevOps & IaC: Terraform, Bicep, Docker, Kubernetes (AKS), Argo CD, Ansible, GitHub Actions, Azure DevOps, Git, Prometheus, Grafana
Scripting & Automation: PowerShell, Python, Bash, SQL, REST APIs, Microsoft Graph API, JSON
Microsoft 365 & Power Platform: SharePoint Online, OneDrive, Power Apps, Power Automate, Power BI, Copilot Studio, ShareGate
AI & MLOps: Azure AI Foundry, Azure ML, MLOps, MLflow, DVC, LLM Observability & Cost Control, Prompt Engineering

EXPERIENCE

Associate Software Engineer Jul 2024 – Present
Hexaware Technologies Ltd. *Chennai, India*

- Migrated on-premises user sites and OneDrive data to **Microsoft 365** for **5,000+ users** using ShareGate, writing **5 PowerShell scripts** for discovery, permission setup, batch execution and post-migration validation.
- Deployed **StorageX Analytics** on a client server to analyse their **NetApp ONTAP** storage, and built a PowerShell script that pulls analytics for **9 storage virtual machines across 2 clusters** and converts the output into CSV.
- Delivered **10 Power BI reports** on that data, one per SVM, on scheduled refresh — so utilisation figures are current before business hours and management always has client-ready numbers.
- Migrated **132 Power Apps** and **50+ Power Automate flows** to a new tenant for an insurance client, and added a SharePoint site and Power BI dashboard giving stakeholders live migration progress and a channel to raise issues.
- Built **Transcend**, a Power App on 5 SharePoint lists with a **Copilot Studio** agent and embedded Power BI, automating end-to-end project lifecycle, resource allocation, cost and milestone tracking for the internal PMO team — **20 projects onboarded** and now their primary tool, replacing hours of spreadsheet upkeep.
- Built a **Terraform** landing-zone POC with remote state in Azure Storage for a client evaluation, and wrote the runbooks and SOPs used at handover.

PROJECTS

InfraGenie — AI Assistant for Azure Infrastructure Operations | *Python, Terraform, AKS, Argo CD, Docker, ServiceNow* 2026

- Owned the architecture and infrastructure design, and built the frontend, backend and Terraform module library using AI coding agents with structured prompting and SOLID principles; on each request the assistant reuses a matching module or writes and saves a new one, runs **Infracost** and policy checks before apply, then logs a **ServiceNow** ticket and emails the admin.
- Fine-tuned **Qwen2.5-Coder-7B** in Google Colab and published it on Hugging Face; deployed the platform on **AKS** with **Argo CD** for drift detection and **Kubecost** for node-level cost monitoring.
- Code: https://github.com/HP04Harsh/infraGenie-AI-Automation-Platform Model: https://huggingface.co/HarshG05/InfraGenie-Azure-Expert

Azure Multi-Region Disaster Recovery Environment | *Terraform, Traffic Manager, VM Scale Sets, Azure SQL, GitHub Actions* 2026

- Provisioned a two-region active/passive Azure environment fully in **Terraform** — Traffic Manager, VM Scale Sets, geo-replicated Azure SQL, remote state with locking — deployed via a **GitHub Actions** plan and apply pipeline, then ran and documented an end-to-end failover test.
- Code: https://github.com/HP04Harsh/azure-multi-region-dr-terraform

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104) — Aug 2026
Microsoft Certified: DevOps Engineer Expert (AZ-400) — exam scheduled Sep 2026
In progress: Terraform Certified Associate; Anthropic Claude Certified Associate

EDUCATION

Bachelor of Computer Applications (BCA) — Completed, CGPA 8.90/10 2020 – 2023
Dr. Babasaheb Ambedkar Marathwada University *Aurangabad, India*

Master of Computer Applications (MCA) — Online, Pursuing 2025 – 2028
Mangalayatan University *India*
