Open to relocate: Bengaluru • Hyderabad • Pune • Chennai • Remote

PROFILE

Software Engineer with 2+ years of experience building AI assistants and workflow automation on Azure and Microsoft 365. Deployed **2 production Copilot Studio assistants** that cut support response time and leadership reporting effort. Builds RAG applications and AI agents with **Python, FastAPI, LangChain, LangGraph and Azure AI Search**, with evaluation and guardrails, and deploys them on Azure with **Docker, Kubernetes and Terraform**. Targeting Applied AI Engineer roles.

EDUCATION

Master of Computer Applications (MCA), Mangalayatan University (Online, pursuing) 2026 – 2028

Bachelor of Computer Applications (BCA), Dr. Babasaheb Ambedkar Marathwada University | CGPA 8.90/10 2020 – 2023

TECHNICAL SKILLS

AI & LLMs: Generative AI, LLM Applications, RAG, AI Agents, Prompt Engineering, Structured Outputs, MCP, Azure OpenAI, Azure AI Foundry, Azure AI Search, Copilot Studio

Frameworks & Evaluation: LangChain, LangGraph, LangSmith, Embeddings, Vector Search (Chroma / FAISS), Hybrid Search, Reranking, RAGAS, Langfuse, Guardrails

Programming & Cloud: Python, FastAPI, Bash, PowerShell, Git, Azure (Entra ID, RBAC, Key Vault), Docker, Kubernetes (AKS), Terraform, Azure DevOps (CI/CD), Linux

Microsoft 365 & Power Platform: Power Automate, Power Apps, Power BI, SharePoint Online, OneDrive for Business, ShareGate

PROFESSIONAL EXPERIENCE

Software Engineer | Hexaware Technologies Ltd., Chennai Jul 2024 – Present

- **AI assistants (Copilot Studio):** Deployed 2 production assistants. A migration support assistant answers from approved guides and resolves most issues itself, **cutting the migration team's average response time for troubleshooting help by 60–70%**. A PMO assistant gives leaders the latest program report before the weekly status (WSR) call, **cutting executive leadership effort by 30–40%**.
- **Workflow automation:** Built 15–20+ Power Automate workflows that ran the full user-migration journey across multiple Microsoft 365 tenants (welcome emails, access requests, reminders, follow-ups), triggered by each user's move date instead of manual coordination.
- **Project onboarding platform:** Built with Power Apps, SharePoint, Power Automate and Power BI. Now the transformation team's main onboarding tool with **40+ projects**, automatic milestone alerts and 3 Power BI dashboards.
- **Storage assessment:** Deployed StorageX at the client site and wrote PowerShell scripts that pull data through its API into CSV files for Power BI. Analysed **10TB+** across 2 NetApp ONTAP clusters, reported permission (ACL) risks and orphaned data, and delivered **9 Power BI reports** and an executive summary.
- **Cloud migration:** Migrated on-premises OneDrive for Business (ODB) sites to the Microsoft 365 cloud for **5,000+ users** using ShareGate and PowerShell, with checks before the move, file comparison after, and live progress on a Power BI dashboard.

SELECTED PROJECTS

InfraGenie — Multi-Agent Assistant for Azure Operations
Tools: Python, FastAPI, React, MongoDB, Docker, Terraform
Demo: infragenie-ai.vercel.app | **Source:** github.com/HP04Harsh/infragenie-aiops

- One router agent and eight specialist agents turn plain-English requests into Azure plans, monitoring, troubleshooting, cost and policy checks.
- Shows cost estimates and policy checks before any change, says clearly when credentials are missing, and raises ServiceNow tickets with root-cause reports.

PolicyQA — RAG Application on Azure AI Search
Tools: Python, LangChain, Azure OpenAI, Azure AI Search, RAGAS, FastAPI
Source: github.com/HP04Harsh

- Built the full RAG pipeline (chunking, embeddings, vector index, **hybrid retrieval and reranking**) behind a FastAPI REST API; every answer shows its source passage.
- Measured retrieval hit rate and answer quality with **RAGAS** on a fixed question set, and added retries and a semantic cache for reliability and cost.

Smart Search & Analyzer — AI Assistant for Documents and Images
Tools: JavaScript, Vite, Python, Groq API
Demo: smart-search-analyzer.vercel.app | **Source:** github.com/HP04Harsh/Smart-Search-Analyzer

- Answers questions about **PDF, DOCX and images**, including photos taken live with a webcam, using a Groq-hosted LLM.
- Each user brings their own API key, so no shared key is stored; recent chats are saved for each session.

CERTIFICATIONS

AZ-900: Microsoft Azure Fundamentals (Mar 2025) | AZ-104: Microsoft Azure Administrator Associate (Oct 2025)
Scheduled: AI-103 Azure AI Apps and Agents Developer Associate | HashiCorp Terraform Associate (004)
