SUMMARY

Cloud & DevOps engineer with 2+ years at Hexaware Technologies. I build and run cloud infrastructure on Azure with Terraform, Kubernetes and CI/CD, and I automate repetitive work so teams get time back. I moved 5,000+ users to Microsoft 365 with 99% data accuracy and saved 20+ hours of manual work every month.

EXPERIENCE

Associate Software Engineer — Cloud Operations & Automation Jul 2024 – Present
Hexaware Technologies Ltd. *Chennai, India*

- Moved **5,000+ users** from SharePoint/OneDrive to Microsoft 365 with **99% data accuracy and zero escalations**; wrote 5 PowerShell scripts for setup, pre-checks and post-migration verification.
- Built an automated storage-analytics reporting pipeline (REST/JSON to CSV to Power BI, 6 PowerShell scripts, 10–15 scheduled reports) that **removed 20+ hours of manual work per month**.
- Created 2 Power Apps and a Copilot Studio AI assistant that replaced **15+ spreadsheets** and cut manual tracking by ∼**80%**; wrote the workflows, dashboards and runbooks.
- Built Azure landing zones in Terraform — networking, access control (RBAC) and policies as code; a new environment now takes ∼**2 hours instead of** ∼**2 days**.
- Handled production incidents and root-cause analysis within SLA using ServiceNow; wrote runbooks and alerts that cut average fix time (MTTR) by ∼**25%**.

PROJECTS

InfraGenie — AIOps Platform for Cloud Operations | *Terraform, AKS, Infracost, ServiceNow, Python, LLM* 2026

- Built an AIOps platform with **7 AI personas** — provisioning, assessment, optimization, observability, troubleshooting, reporting, and policy & compliance — powered by a **fine-tuned Qwen2.5-Code-7B** published on Hugging Face; plain-English requests become Terraform plans with Infracost cost/policy pre-flights.
- Monitors Azure resources **24x7**: when Prometheus/Grafana alerts fire, the AI diagnoses, auto-heals safe issues and logs a **ServiceNow** ticket with the suggested fix, audit trail and one-click human approval.
- github.com/HP04Harsh/infraGenie-AI-Automation-Platform · huggingface.co/HarshG05/InfraGenie-Azure-Expert

Azure Multi-Region DR Infrastructure | *Terraform, Traffic Manager, VM Scale Sets, Azure SQL* 2026

- Built a two-region disaster-recovery setup fully in Terraform — traffic routing, auto-scaling servers and replicated storage — so the system can fail over with **zero downtime**.
- github.com/HP04Harsh/azure-multi-region-dr-terraform

Azure RAG Assistant on AKS (AI Platform) | *Azure OpenAI, AI Search, AKS, KEDA, GitHub Actions* 2026

- Deployed a RAG assistant on AKS — Azure OpenAI + Azure AI Search with **KEDA autoscaling**, per-team budgets and a CI eval gate; token-cost dashboards and alerts in Grafana.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AKS, VM, VNet, Blob Storage, Log Analytics/KQL, Azure Monitor, RBAC/IAM, Key Vault, ACR), Microsoft Entra ID
Containers & Orchestration: Kubernetes (AKS), Docker, Helm, KEDA Autoscaling
IaC & Automation: Terraform, Bicep, Git, Linux, Bash
CI/CD & GitOps: GitHub Actions, Azure DevOps, Argo CD, Jenkins, GitLab CI
Observability & ITSM: Prometheus, Grafana, Azure Monitor, ServiceNow (ITSM)
AI/ML-Ops: MLflow, DVC, model deployment, Azure OpenAI
Programming: Python, PowerShell, SQL, REST APIs

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104) — Aug 2026
Microsoft Certified: DevOps Engineer Expert (AZ-400) — Expected Sep 2026
NVIDIA NCA — AI Infrastructure Operations — In Progress
Claude Certified Associate — Anthropic — Expected Sep 2026

EDUCATION

Dr. Babasaheb Ambedkar Marathwada University Aurangabad, India
Bachelor of Computer Applications (BCA) — CGPA 8.90/10 *2020 – 2023*
Mangalayatan University (Online) India
Master of Computer Applications (MCA) *Expected 2028*
